

Speak; it's a cell phone!

If you have used a cell phone the idea is:

- Your part
- Cell phone's part
 - When done together gets the result wanted – communication.

Now it would be silly to want to take on some of the task the phone does

- Check frequency
- Select how to connect
- Adjust power output

Now this is just a guess on my part what this phone is doing

Glory to you forever and ever

Thank you in the name of Jesus

Thank you,

Lord in the name of Jesus
